The costs of admission and readmission to care facilities for those with chronic conditions can add up quickly, making post-acute care a vital opportunity to improve health outcomes and save on future spend.

With more than 1.5 million members in our care and expertise in government health programs, Evernorth’s PAC solution simplifies and reduces the cost of care. Our robust program leverages in-home, virtual and telephonic capabilities, supported by a team of clinicians from a range of specialties. This collaborative and flexible approach to care results in reduced re-admission rates and faster patient recovery rates.

How it works

1. Evernorth is notified of a patient in need of PAC services.
2. Our nurses and physicians assess the patient’s individual care needs using evidence-based clinical guidelines.
3. A care plan is developed and shared with the patient, providers and facility.
4. Weekly case conferences ensure that patient is getting the appropriate care and making expected progress toward recovery.
5. Evernorth coordinates transition of care planning, medication adherence management and durable medical equipment, as needed.

Evernorth’s Post-Acute Care (PAC) program
Works with health plans and risk-bearers to ensure patients receive appropriate care in skilled nursing facilities, rehabilitation facilities and long-term acute care facilities, and transition safely home following treatment.

15% of total Medicare spend results from post-acute care

Features

- Comprehensive care teams
- Multi-modal delivery
- Transition-of-care support
- Flexible offerings
Delivering better results with multi-layered support

Evernorth’s PAC solution focuses on whole-person health and proactive strategies across the continuum of care to reduce costs while promoting total health.

**Health equity:** Social workers partner directly with our nurses and PAC facility staff to address social determinants of health barriers to facility discharge and identifying community resources to support patients as they transition home.

**Clinical expertise:** For high-risk and high-cost patients, our physicians have expertise in post-acute care clinical guidelines. As needed, we’ll also bring in board-certified specialists for additional case review.

**Collaborative client partnership:** We’re flexible to meet individual payer needs—from pricing to network engagement to working with existing vendor relationships.

**Increased savings:** With risk-based funding models, we assume financial responsibility for all delegated PAC medical spend and readmission trend.

Recovery after hospitalization doesn’t happen overnight, and no one should do it alone. Evernorth will be there every step of the way to help your members worry less about coordinating complex post-acute care and more on getting and staying healthy.

Cost-saving readmission avoidance

Our far-reaching support ensures patients maintain health progress after facility care and are connected to the management resources they need, including:

+ Primary care provider (PCP) and specialist follow-up
+ Referrals to health plan care management and benefits
+ Individualized risk assessments
+ Home visits for high-risk members
+ Social worker support
+ Medication reconciliation
+ Caregiver education
+ Regular RN outreach and health surveys

Improved savings and outcomes

By providing optimal, efficient and effective care for each individual, our post-acute care program yields better results:

| **10-20%** | average savings³ |
| **53%** | decrease in long-term acute care (LTAC and inpatient rehab admissions⁴) |
| **27%** | shorter length of stay in skilled nursing facilities (SNF) |
